DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-34, drawn to a method, a computer readable medium and a system for providing information on system vulnerabilities comprising populating a database, obtaining keywords and selecting a database page, classified in class 707, subclass 102.
 - II. Claims 35-39, drawn to a system for providing system vulnerability information comprising an input/filter module to receive input from a user's processing device, classified in class 707, subclass 104.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a system providing information on system vulnerabilities; invention II has separate utility such as a system providing information on system vulnerabilities including an input parser/filter module to receive input from a user's processing device. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2161

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
